Web Developer & Designer

Freelance web developer and designer with over 25 years experience of HTML, PHP and MySQL

Address: Peterborough, UK

Email: barry@bhookway.com

Contact phone: 07913 694806

Portfolio website: <https://www.bhookway.com>

Relevant work experience:

2010 – Present

Freelance Web Developer/Designer

I have personally worked on over 200+ websites and web applications during this period, single-handedly completing all back end and front coding requirements and the majority or all of the front end design work. Websites have ranged from simple portfolio sites to more advanced e-commerce projects including custom stock control and order handling software.

I have also built several CRM systems for various clients with various levels of functionality, some of which continue to be expanded upon to this day.

I use my own custom coded CMS system for my websites, and have never used any off the shelf systems such as Wordpress, although I am prepared to work with those if required for certain projects.

Please refer to my portfolio website for an up to date list of some of my recent work: www.bhookway.com

Key Skills

- PHP
- MySQL
- HTML5
- CSS3
- Javascript/jQuery/Ajax
